# Research & Innovation

## Network

Finding solutions to the complex scientific and technological issues we face today often calls for an interdisciplinary approach. The University of Kaiserslautern, ten renowned research institutes and research-oriented institutions, ten companies as well as numerous supporting members have joined forces to form the Science and Innovation Alliance Kaiserslautern e.V. Together they aim at boosting the city's reputation as distinguished location in the field of research and academic studies at a regional, national, and international level.

### Major topics:

- Industry 4.0
- Commercial Vehicles
- Construction
- Energy
- Health

As competent partners and with a special focus on the area of digital transformation, the members of the Science and Innovation Alliance explore these topics in order to address the challenging economic and social issues of our time.

## Full Members

### Science and Innovation Alliance Kaiserslautern e.V.

#### UNIVERSITIES

University with a strong regional network, application-oriented research, and dual degree programmes. \*

Medium-sized university offering excellent research and teaching. Home to one of the largest distance learning providers. \*

#### RESEARCH INSTITUTIONS

The world's largest research institute for artificial intelligence and its applications. \*

Software & systems engineering – research for the real world. \*

Mathematics – research for real applications. \*

Active compounds for health and plant protection. \*

Centre for surface and thin films analytics. \*

Research and development for the relations between humans and organisations. \*

Cutting-edge research for lightweight design. \*

Cutting-edge research in software systems. \*

Light as a tool – research for industrial applications.

One of Rhineland-Palatinate's largest municipal healthcare providers.

\*Founding member
